

PROTECTING THE HEALTH AND SAFETY OF PEOPLE GUIDES US IN EVERYTHING WE DO

Val Vista is regulated by and in full compliance with several government agencies.

Safety: Mine Safety and Health Administration (MSHA), Occupational Safety and Health Administration (OSHA) and Arizona State Mine Inspectors (ASMI); **Air & Water:** Maricopa County Air Quality Department, Environmental Protection Agency (EPA) and Arizona Department of Environment Quality (ADEQ).

Nationally, our safety performance consistently leads the industry.

VAL VISTA
 Lost-time incident hours since 2006:
Zero
 MSHA Inspections:
0.29 violations per inspection day vs. 1.05 for the industry

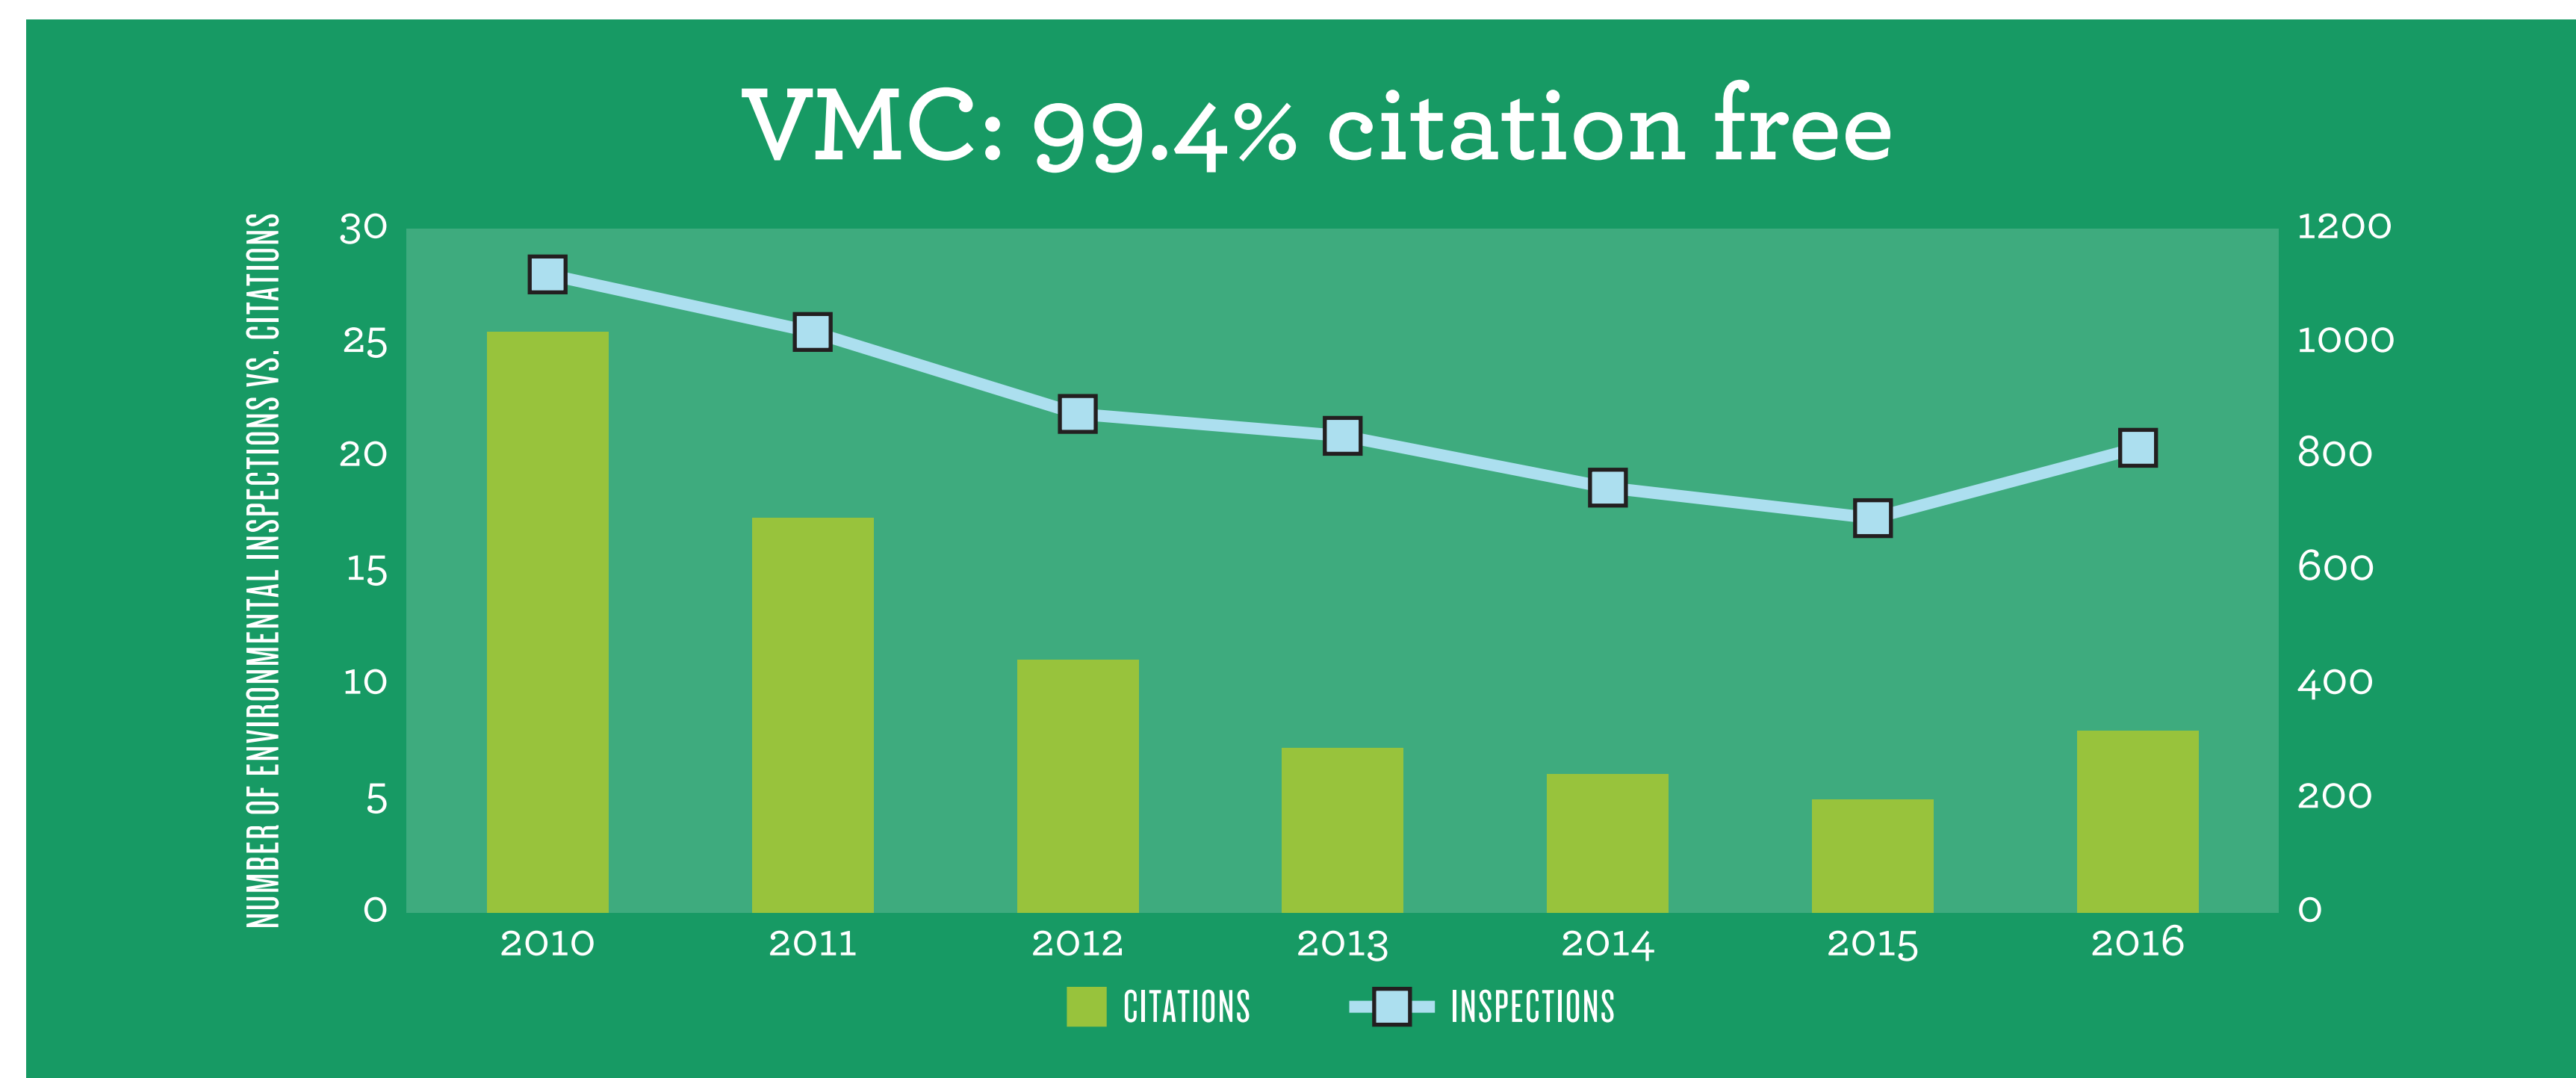

RESPONSIBLE STEWARDS OF THE ENVIRONMENT

Clean air, pure water and environmental responsibility are essential.

AT A GLANCE:

- 99.4% Citation Free Environmental Inspection Rate
- 44 Wildlife Habitat Council certified sites
- 2.6 million tons of products manufactured from recycled materials

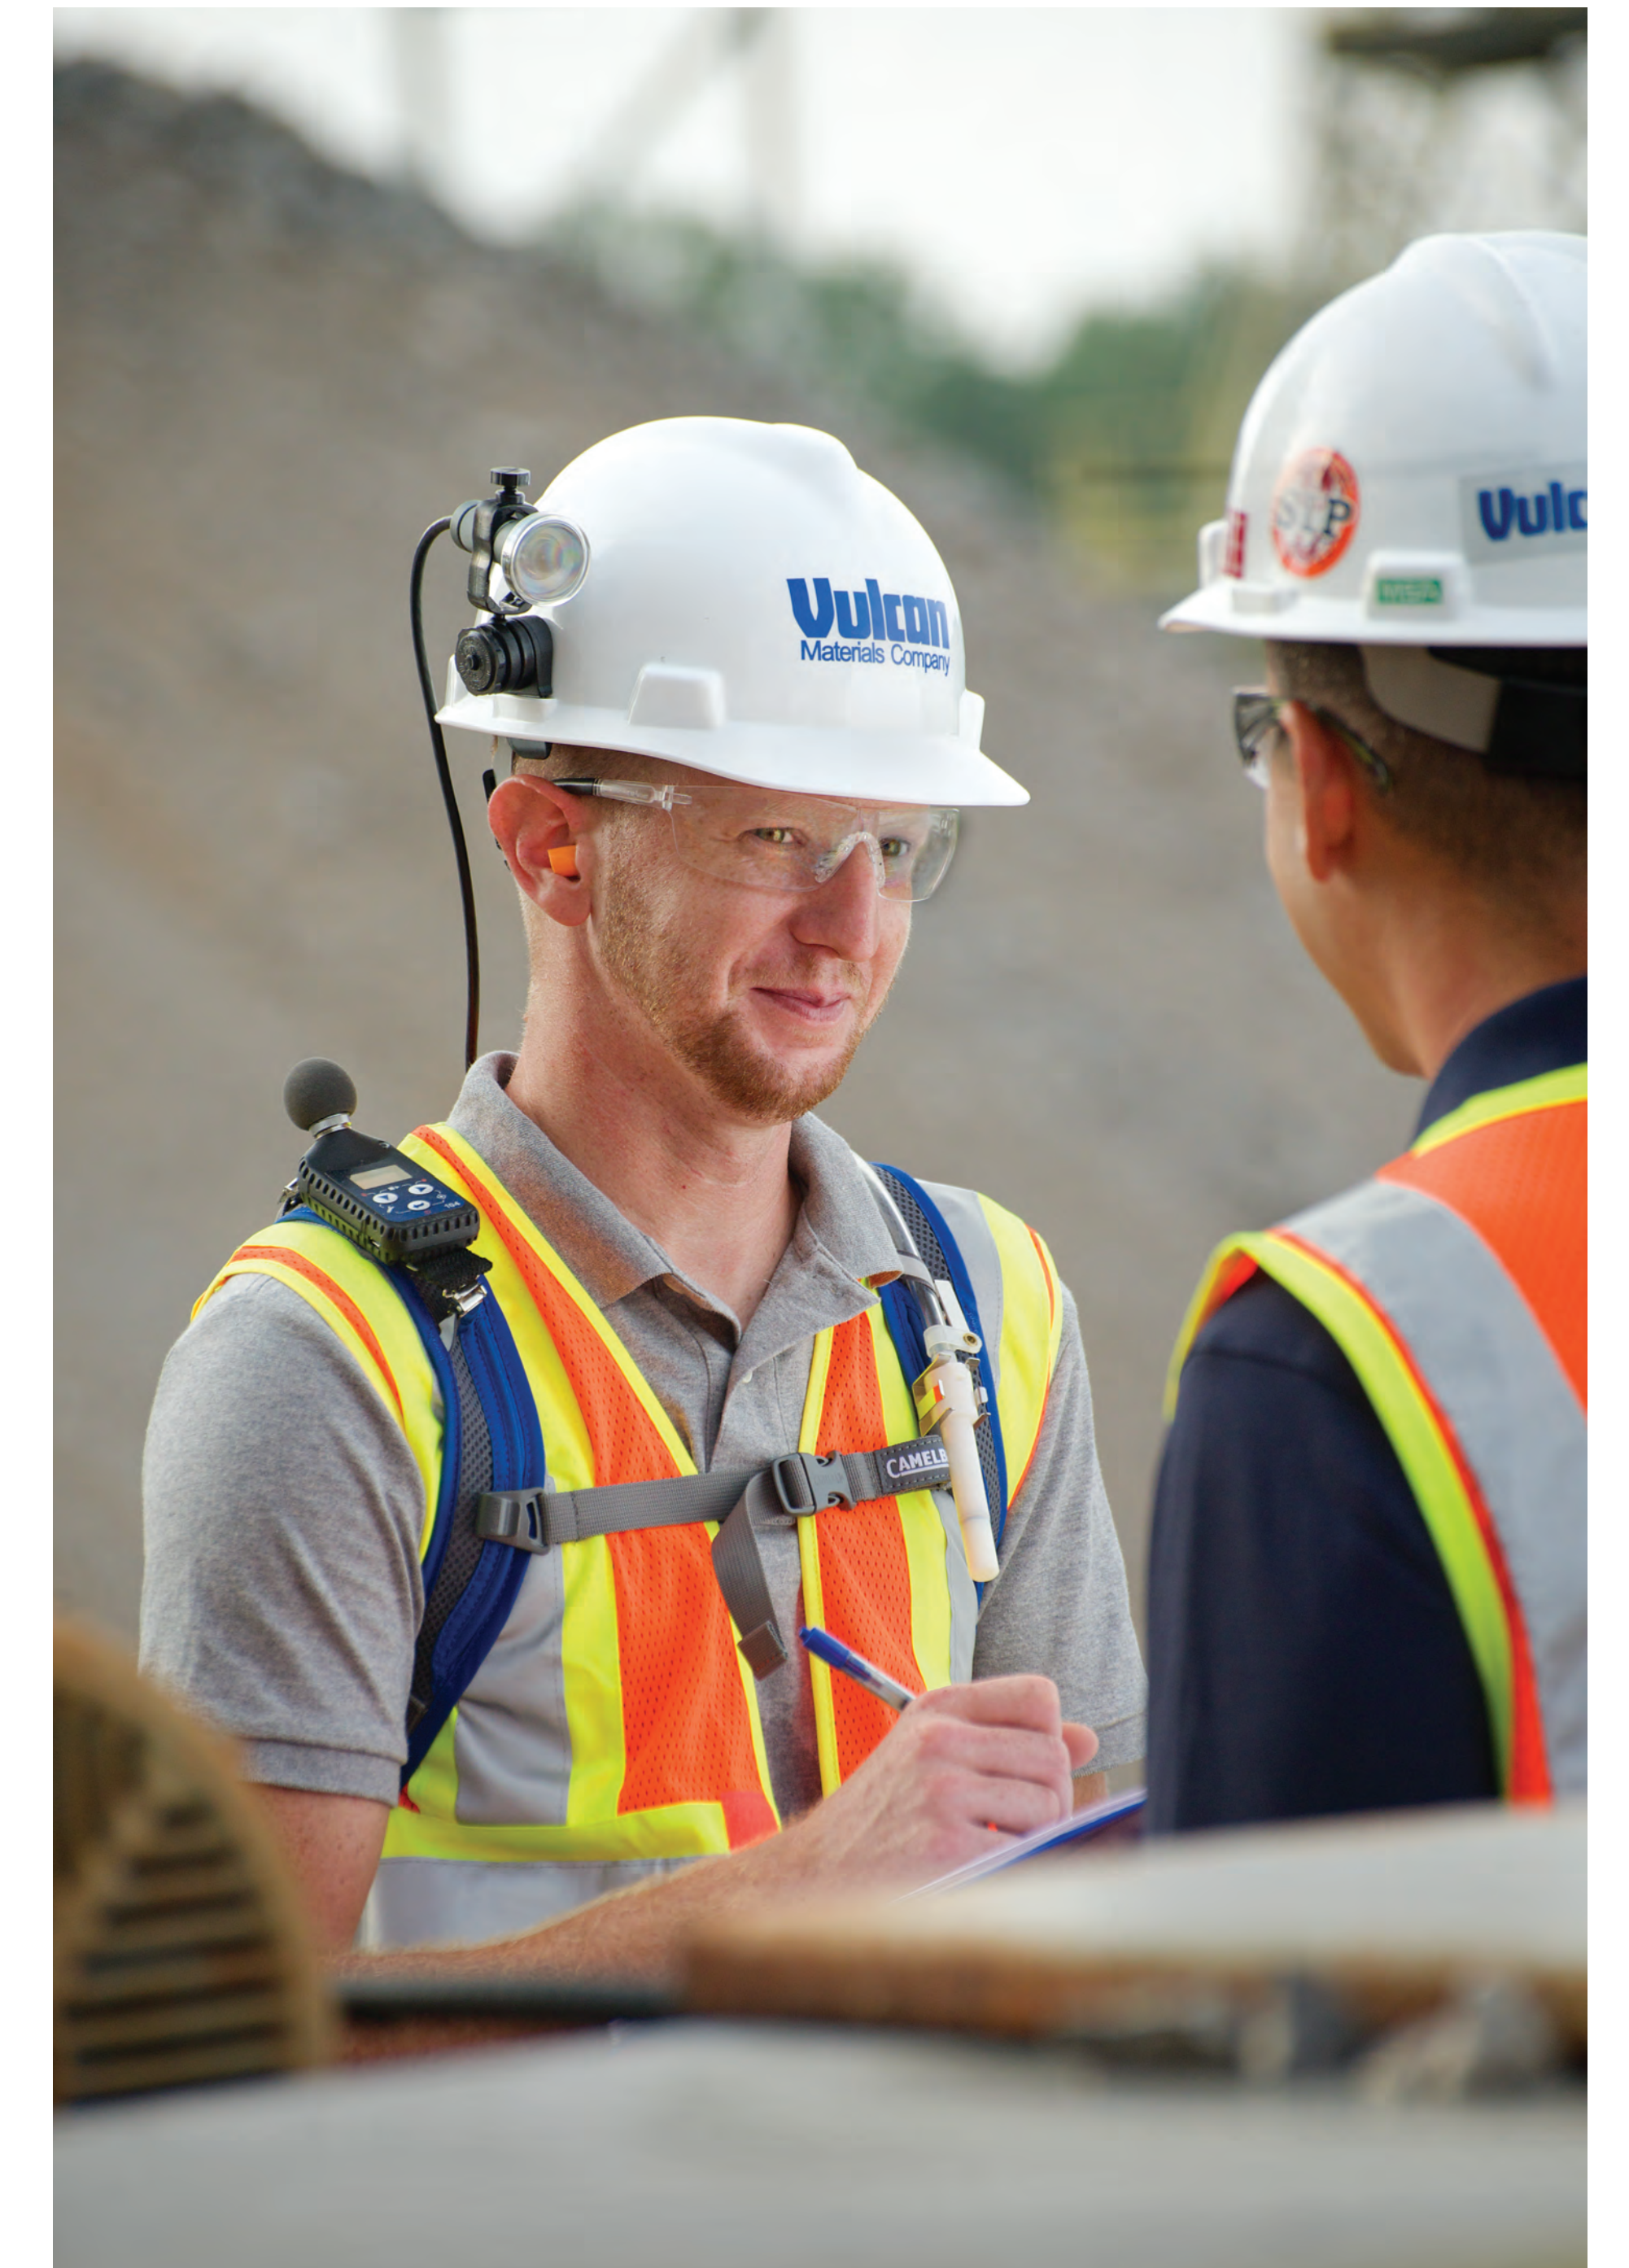

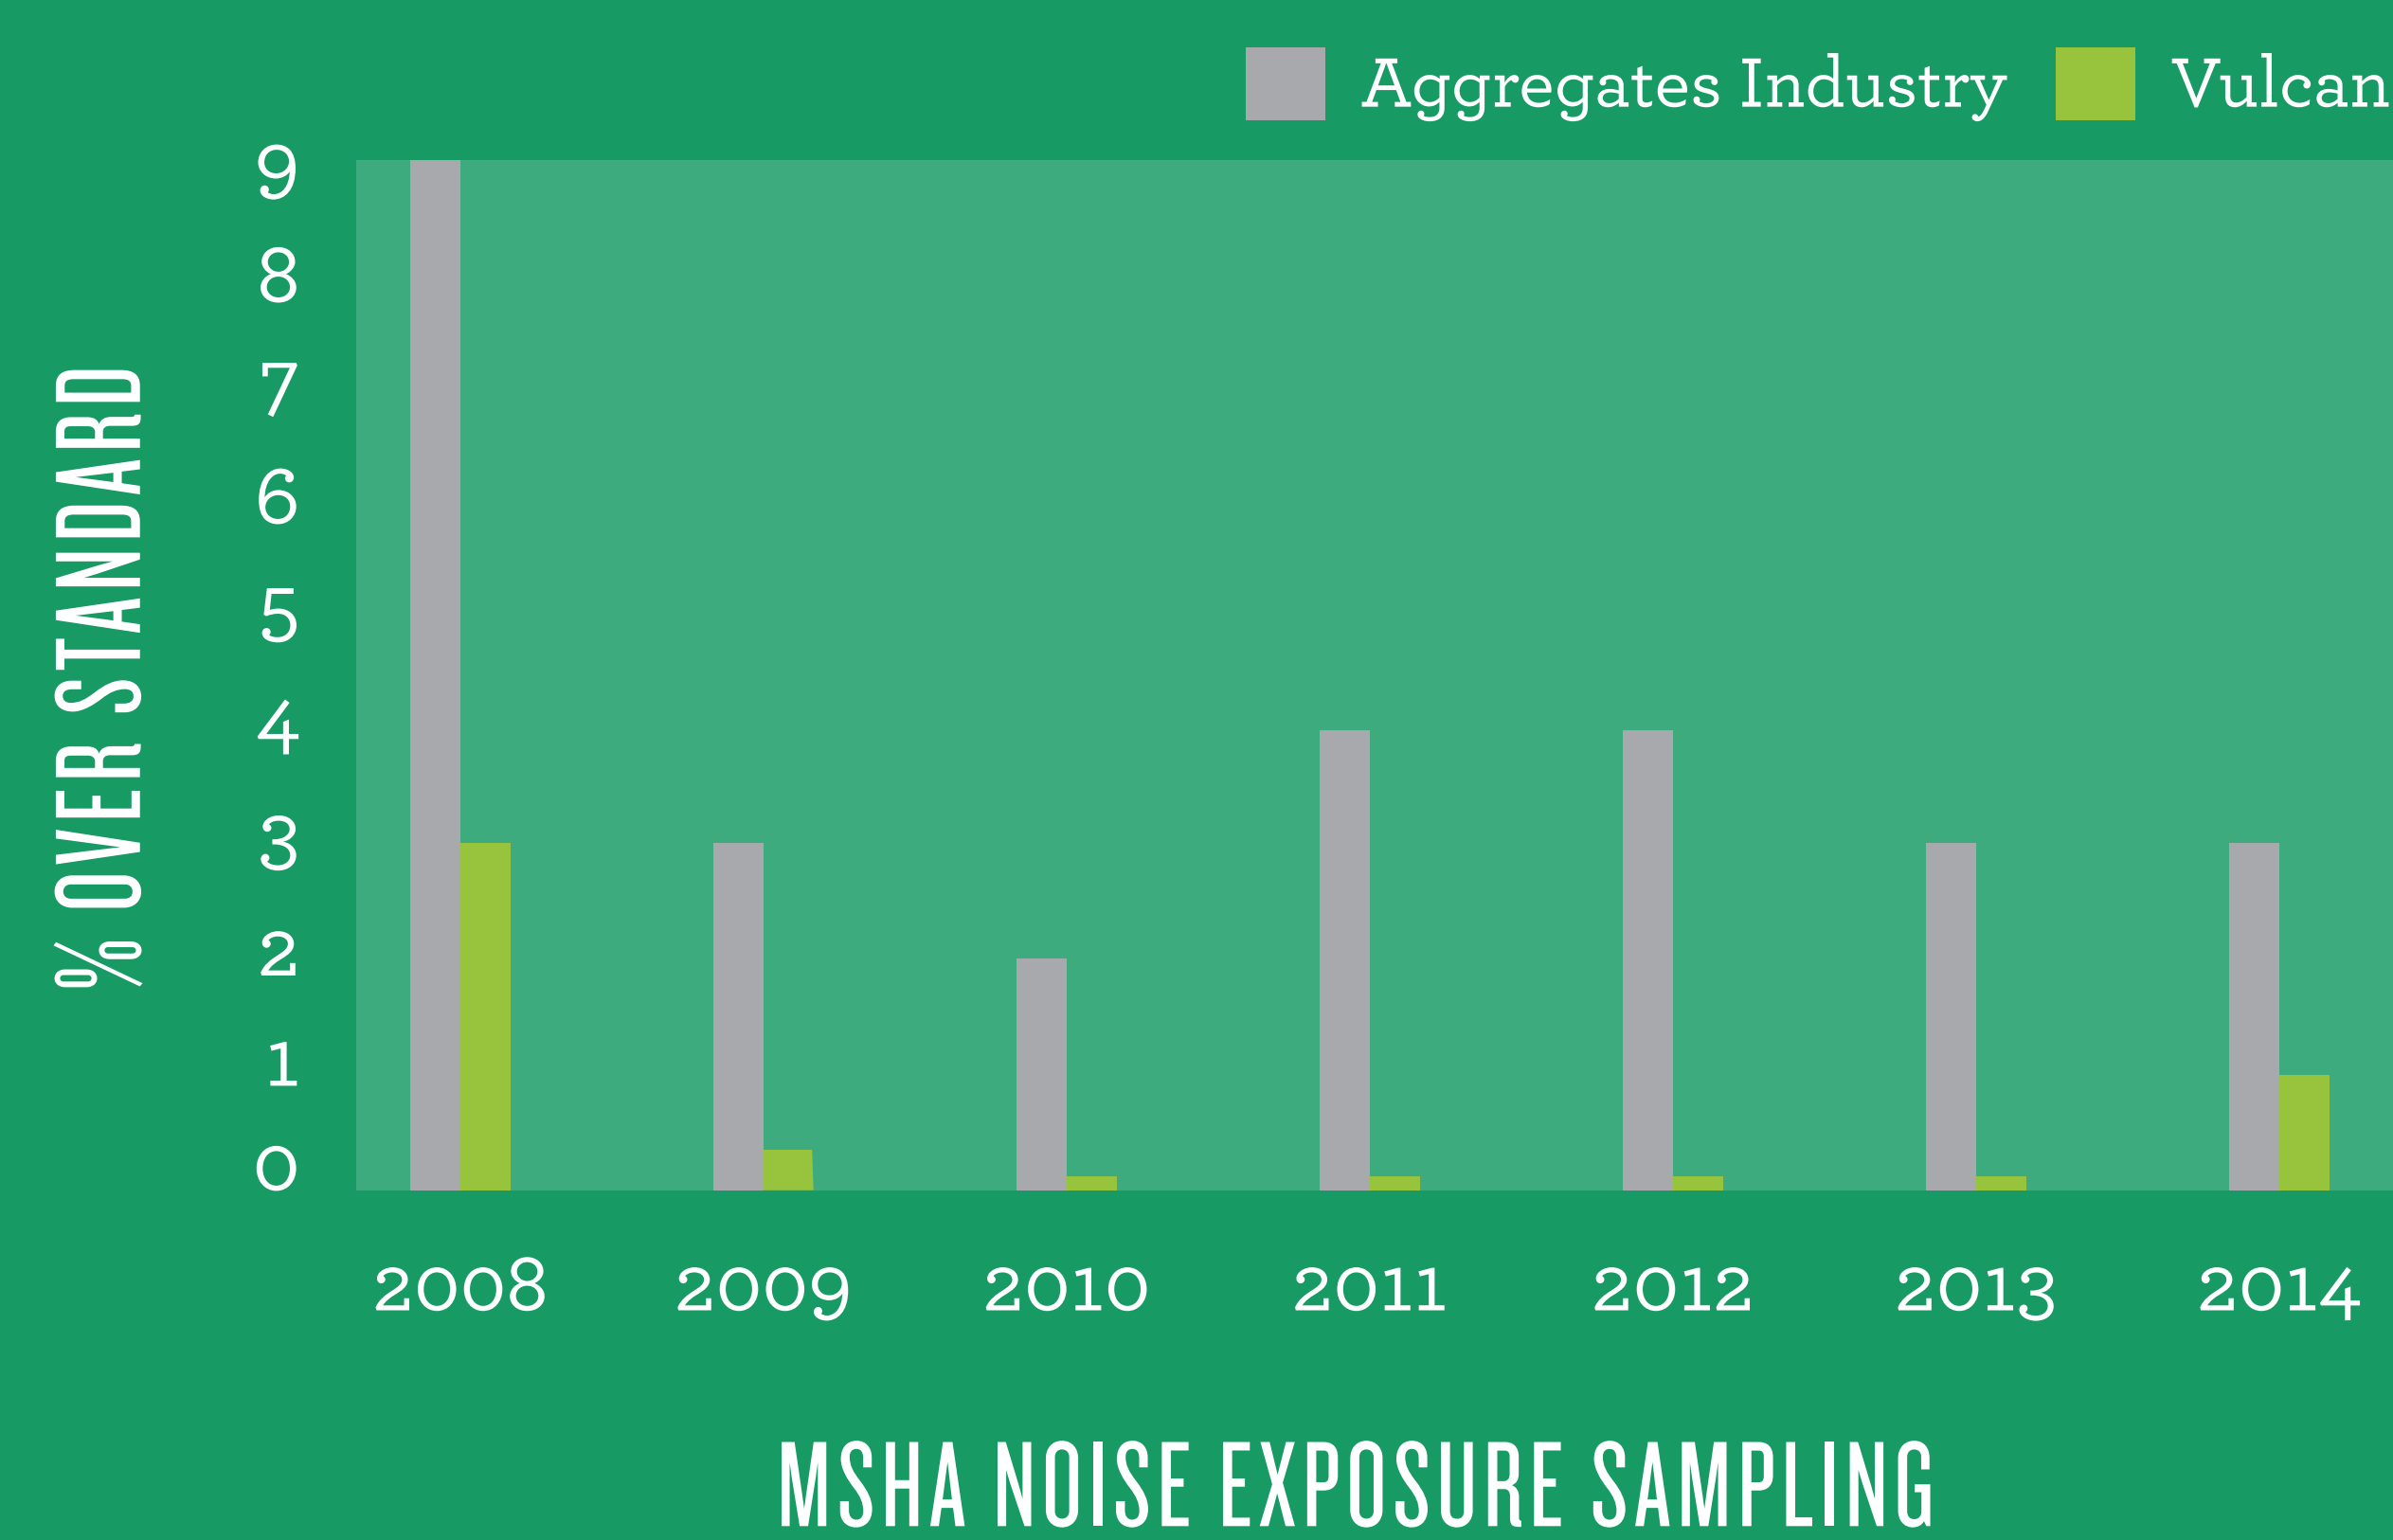

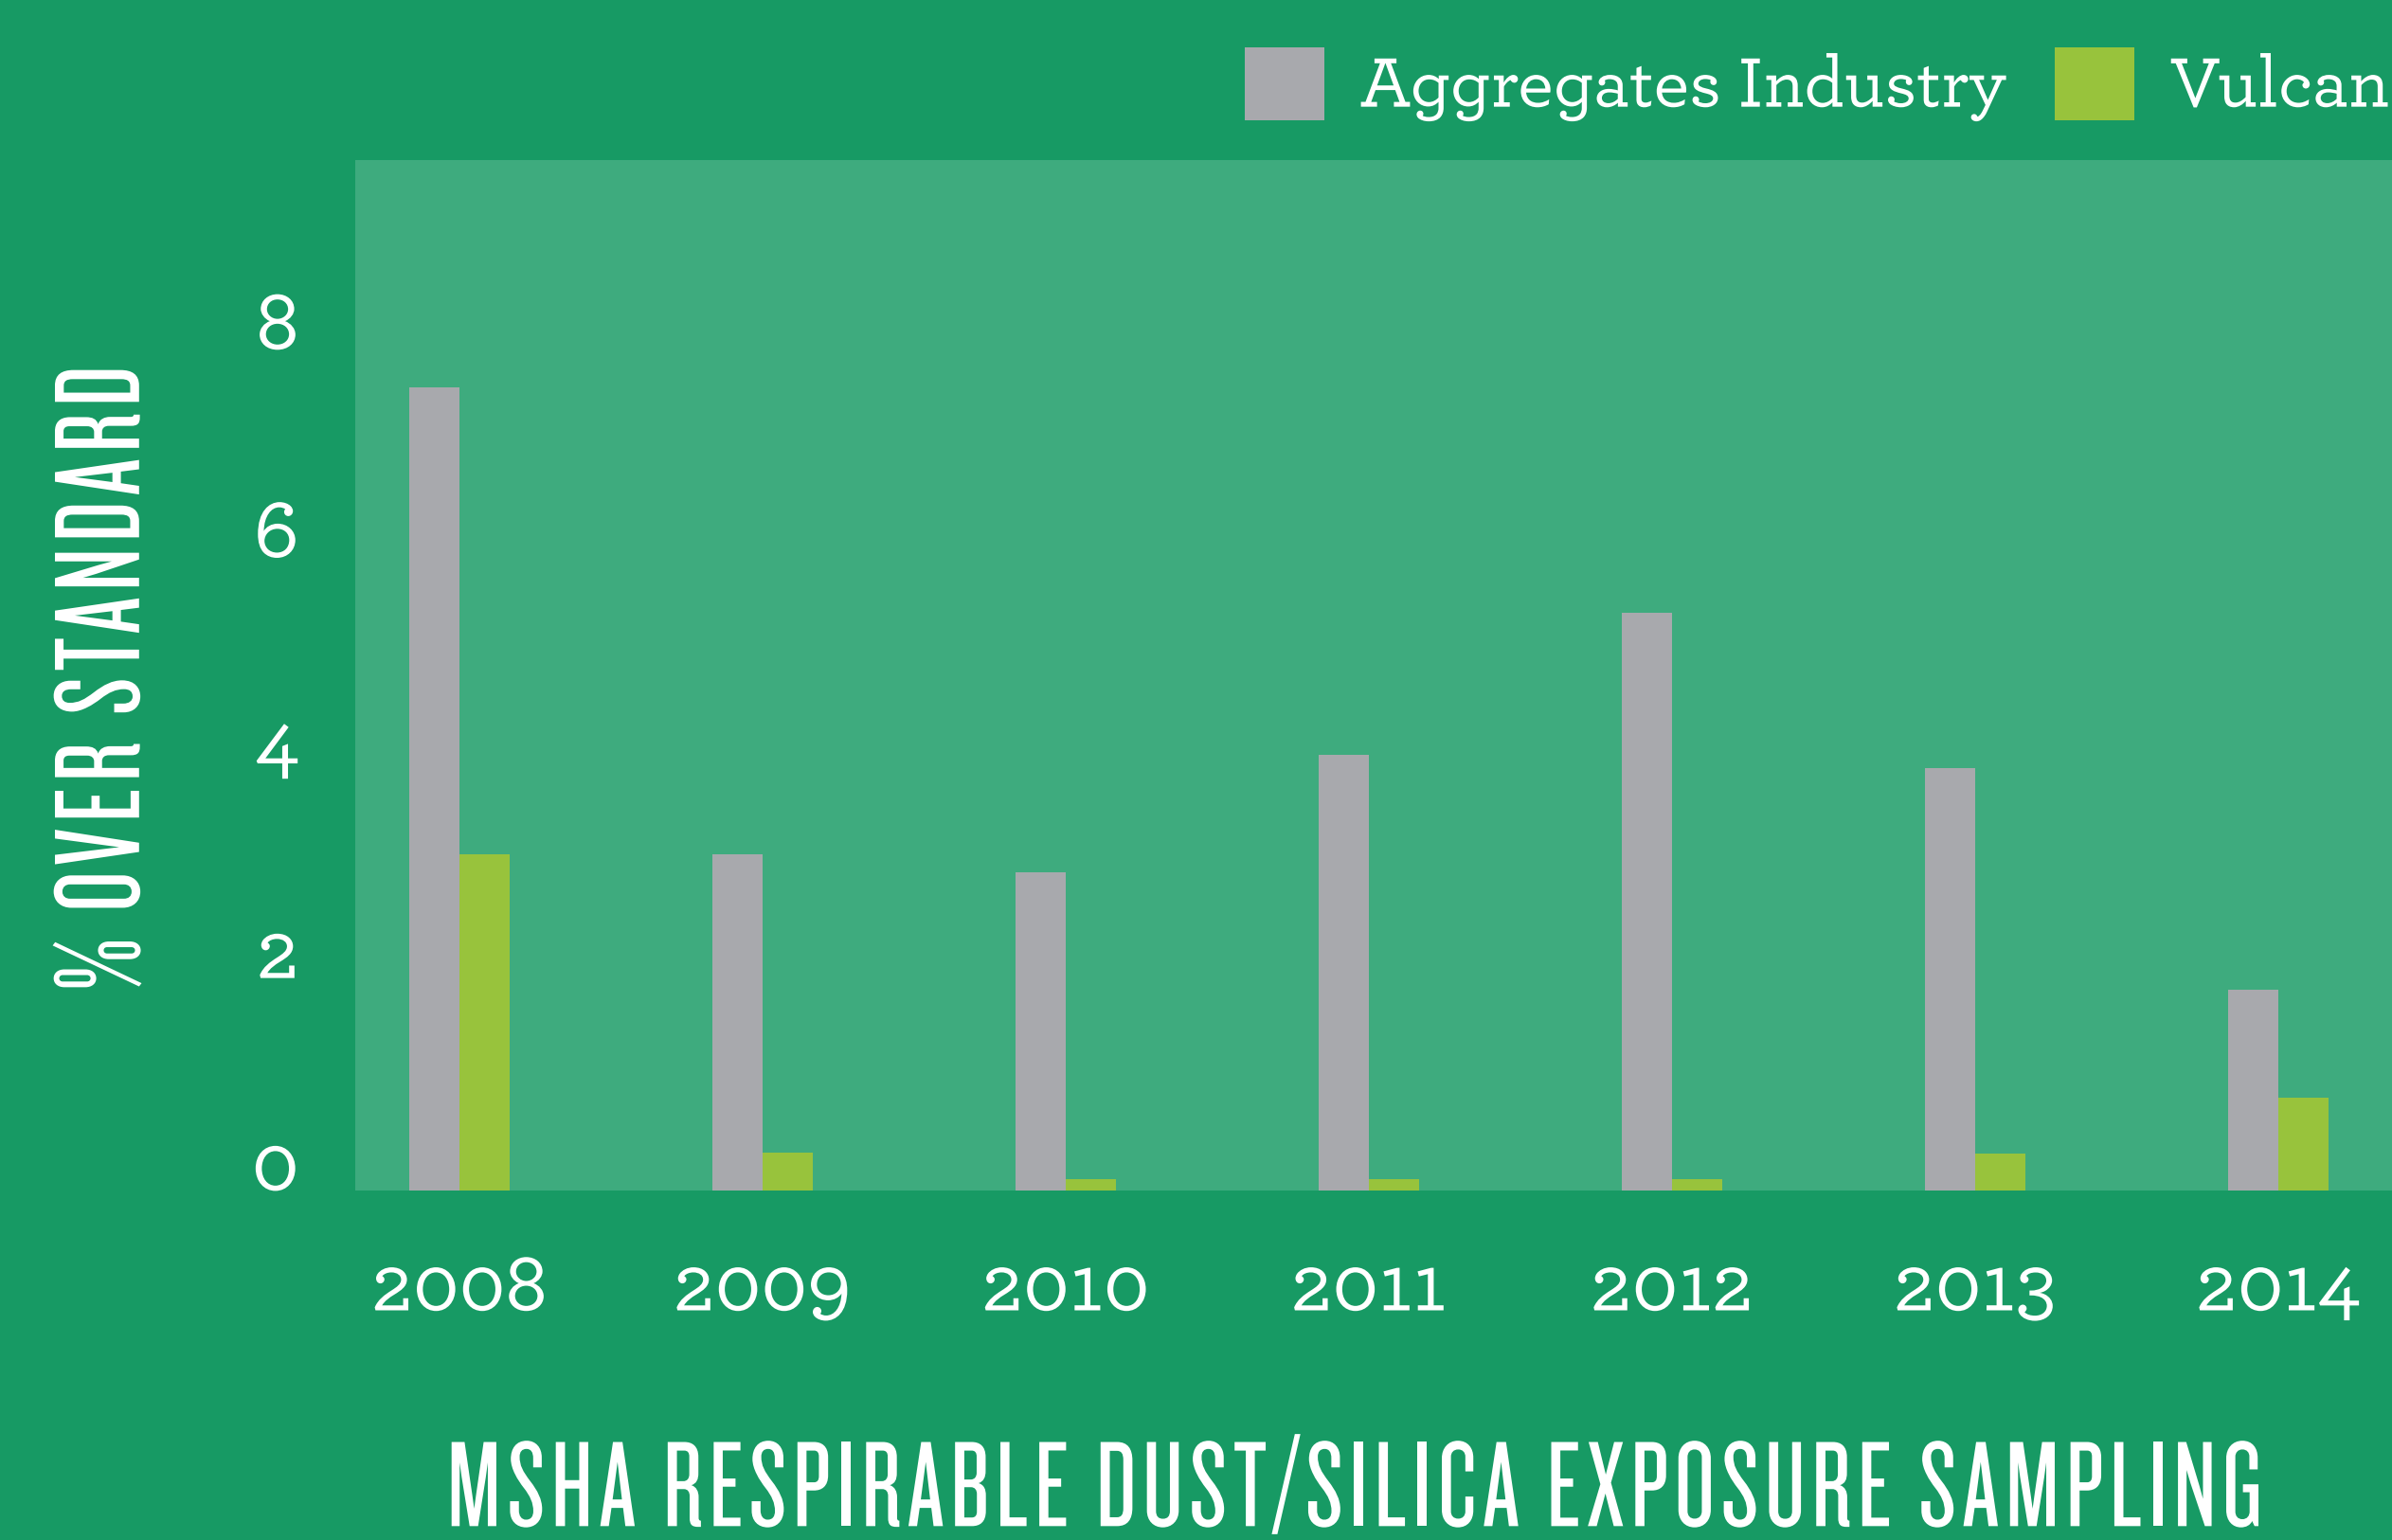

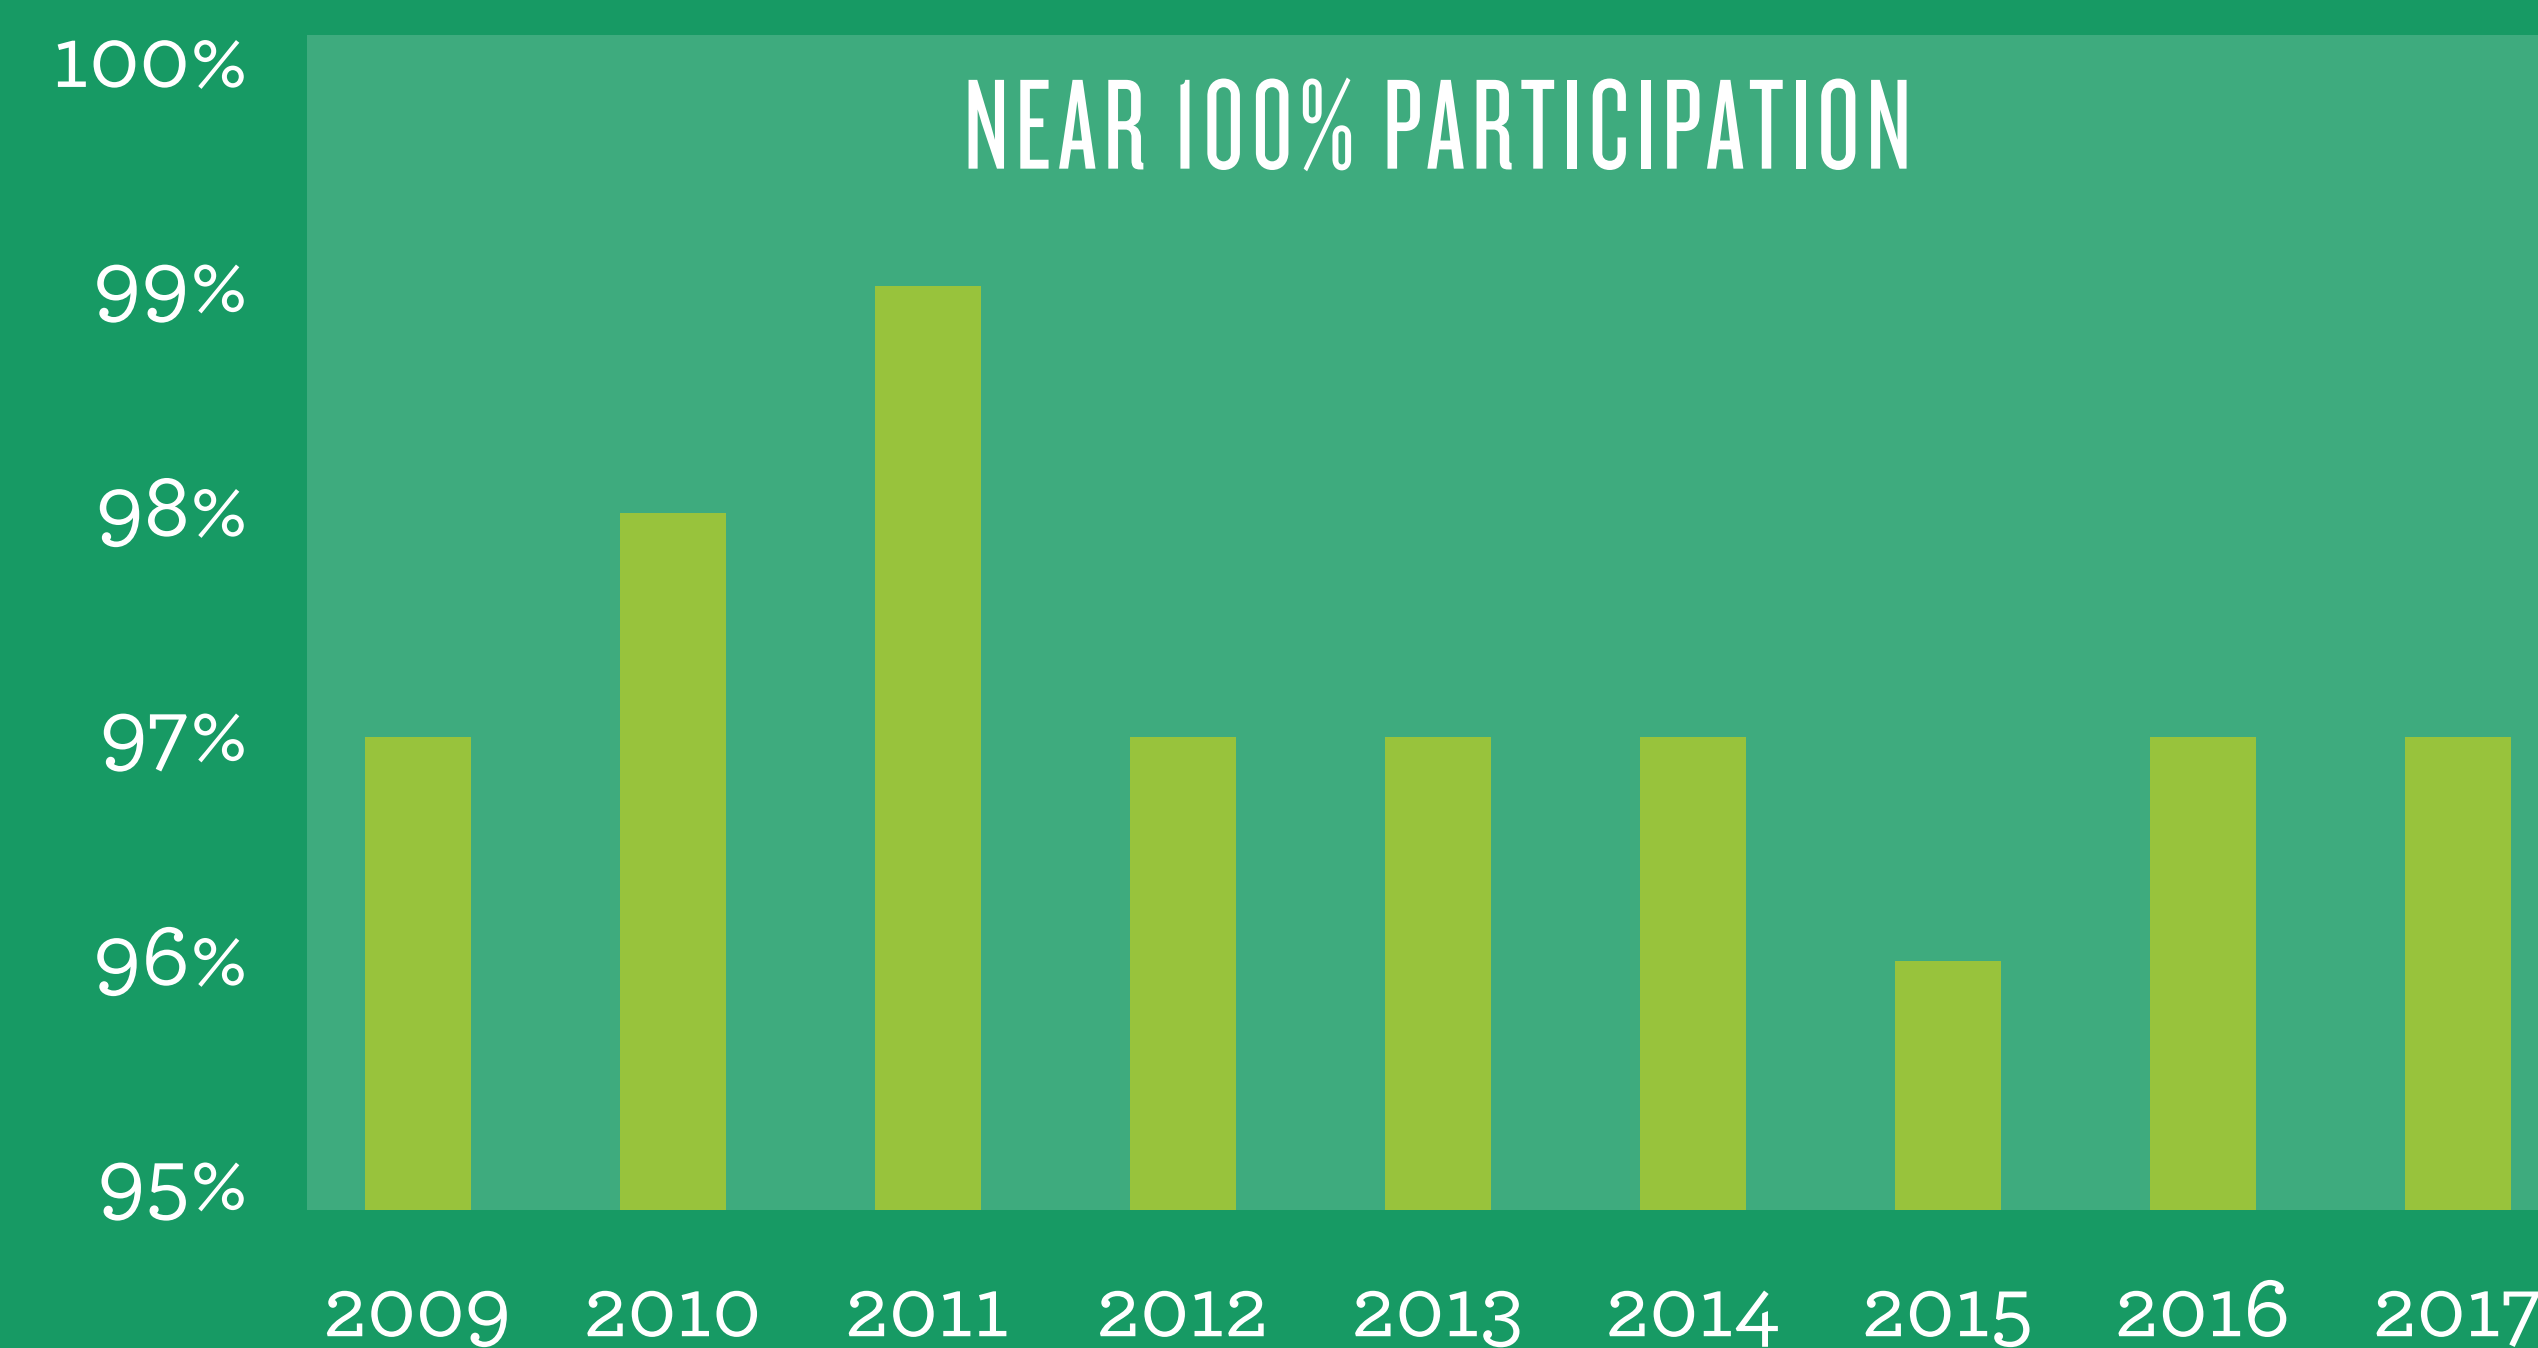

Val Vista Sand & Gravel is in compliance with all laws and regulations, and is considered by local, state and federal regulatory officials to be protective of public health and safety.

PROTECTING EMPLOYEE HEALTH

As an industry leader in protecting the health of our employees, our operations are safe for our employees inside the gate and our neighbors beyond.

Participation in Occupational Health Medical Screening is both consistent and traditionally high.

Our video exposure monitoring program records data in real time with sensors that sample air and noise to help identify potential health risks.

PROTECTING AIR QUALITY

Vulcan has established a strong record of environmental stewardship and operates Val Vista in a manner that is considered by local, state and federal regulatory officials to be protective of public health and safety.

Air quality controls at Val Vista include:

- Paved customer truck roads with rumble gates
- Water truck to water roads and stockpiles
- Street sweep paved roads and entrance/exits
- Mounted water spray bars on conveyors, crushers and fixed plant equipment
- Comprehensive and Method 9 Dust Control Training
- Baghouse on hot mix asphalt plant
